AREA DESCRIPTIONS

NORTH BOONE

This area is essentially trailless with opportunities for solitude. Broad expanses of lodgepole pine are found. Grizzly bear habitat.

SOUTH BOONE - HORNITY PEAK

Access is via the South Boone and Hornity Peak trailheads. Secondary trails provide for low visitor use. Large open meadows, aspen, willow, and aspen cliffs are key features. Remains of the Lucky Lady gold mine can be found. Horse use predominates. Grizzly bear habitat.

HIDDEN CORRAL BASIN - HIDDEN LAKE

Access is via the Coyote Meadows trailhead. Primary trails provide for moderate visitor use levels with horse use predominating. Key features include two small lakes, wildlife especially black bear and moose, fishing and the Moose Mountain slide area. Grizzly bear habitat.

INDIAN MEADOWS - BADGER CREEK

Access is via the Badger Creek and North Leigh trailheads. Visitor use is low with secondary trails. Key features include streams and large meadows. Rugged peaks and wildlife. Digging associated with mining are still evident. Domestic sheep may be encountered.

GREEN LAKES - GRANITE BASIN

Access is via the North Leigh and South Leigh trailheads. Primary and secondary trails provide for relatively high visitor use with many large groups visiting the area. Key features include two subalpine lake basins, views of central Teton peaks, wildflowers, wildlife, fishing and fossilized algal colonies. Sheep and cattle grazing occurs.

NORTH TETON - SOUTH TETON

Access is via the Teton trailhead. Visitor use is high during the summer with many large groups visiting the area. Foot travel predominates. Attractions include limestone cliffs and wildflower meadows. Bighorn sheep use the Teton area as essential habitat.

SOUTH DARBY CANYON

Access is via the Darby trailhead. Visitor use is high during the summer with many large groups visiting the area. Foot travel predominates. Attractions include limestone cliffs and wildflower meadows. Bighorn sheep use the Darby area as essential habitat.

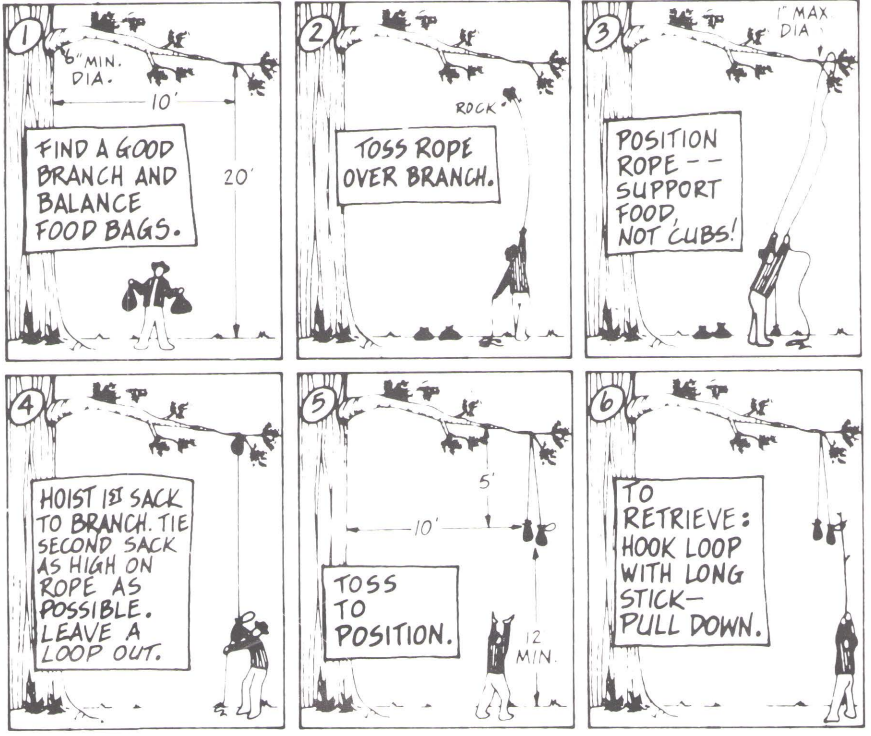

FOX CREEK - GAME CREEK

Access is via the Fox Creek and Game Creek trailheads. Secondary trails provide for low visitor use. There are many stream crossings. Streams, wildlife, meadows and a waterfall are key features. Camping areas are limited. Sheep grazing occurs in Game Creek.

MOOSE CREEK - COAL CREEK

Access is via the Moose Creek and Coal Creek trailheads. Primary trails allow for moderate visitor use. Attractions include a waterfall, fishing, wildlife, meadows, beaver ponds, and some small lakes. Sheep grazing occurs.
