PURPOSE AND CONTENTS OF THIS MAP

The designations shown on this motor vehicle use map (MVUM) were made by the responsible official pursuant to 36 CFR 212.51; are effective as of the date on the front cover of this MVUM; and will remain in effect until superseded by next year's MVUM.

Heather C. Provencio

Forest Supervisor, Kaibab National Forest

It is the responsibility of the user to acquire the current MVUM.This MVUM shows the National Forest System roads, National Forest System trails, and the areas on National Forest System lands in the North Kaibab Ranger District that are designated for motor vehicle use pursuant to 36 CFR 212.51. This MVUM also identifies the vehicle classes allowed on each route and in each area; and any seasonal restrictions that apply on those routes and in those areas.

Designation of a road, trail, or area for motor vehicle use by a particular class of vehicle under 36 CFR 212.51 should not be interpreted as encouraging or inviting use or implying that the road, trail, or area is passable, actively maintained, or safe for travel. Motor vehicle designations include parking along designated routes and at facilities associated with designated routes when it is safe to do so and when not causing damage to National Forest System resources. Seasonal weather conditions and natural events may render designated roads and trails impassable for extended periods. Designated areas may contain dangerous or impassable terrain. Many designated roads and trails may be passable only by high-clearance vehicles or four-wheel-drive vehicles. Maintenance of designated roads and trails will depend on available resources, and many may receive little maintenance.

This motor vehicle use map identifies those roads, trails, and areas designated for the motor vehicle use under 36 CFR 212.51 for the purpose of enforcing the prohibition at 36 CFR 261.13. This is a limited purpose. The other public roads are shown for information and navigation purposes only and are not subject to designation under the Forest Service travel management regulation.

These designations apply only to National Forest System roads, National Forest System trails, and areas on

Parking Along Designated Routes
Motor vehicles may be parked up to 30 feet from the edge of the road surface when it is safe to do so without causing damage to NFS resources or facilities, unless prohibited by state law, a traffic sign, or an order (36 CFR 261.54).

For ease of navigating, we recommend you obtain a Kaibab National Forest Visitor Use Map from your USDA-FS office.

PROHIBITIONS

It Is prohibited to possess or operate a motor vehicle on National Forest System lands on the Kaibab National Forest other than in accordance with these designations (CFR 261.13)

Violators of 36 CFR 261.13 are subject to a fine of up to $5,000, imprisonment for up to 6 months, or both (18 U.S.C. 3571(e)).This prohibition applies regardless of the presence or absence of signs.

This map does not display nonmotorized uses, over-snow uses, or other facilities and attractions on the Kaibab National Forest. Obtain forest visitor information from the local national forest office.

Designated roads, trails and areas may also be subject to temporary, emergency closures. As a visitor, you must comply with signs notifying you of such restrictions. A national forest may issue an order to close a road, trail or area on a temporary basis to protect the life, health, or safety of forest visitors or the natural or cultural resources in these areas. Such a temporary and/or emergency closures are consistent with the Travel Management Rule (36 CFR 212.52 (b), 36 CFR 261 subpart B).

The designation "road or trail open to all motor vehicles" does not supersede State traffic law.

EXPLANATION OF LEGEND ITEMS

Roads Open To All Vehicles
These roads are open to all motor vehicles, including smaller off-highway vehicles that may not be licensed for highway use (but not to oversize or overweight vehicles under State traffic law).

Dispersed Camping/Game Retrieval
This symbol is used along with a designated road or trail to indicate limited cross-country motor vehicle use within a specific distance of that route, solely for the purpose of dispersed camping and/or game retrieval. The dots indicate where this activity is permitted. Refer to the Dispersed Camping/Game Retrieval Table for specifics.

Other Public Roads Highways, U.S., State; Other Public Roads

These symbols are used to show routes the Forest Service does not have jurisdiction over and has not designated for motorized use. These symbols are part of the reference layers showing connections to towns and cities outside the forest boundary.

Short Route Identifier
This symbol is used for roads that are too short to show a symbol type on the map. The symbol contains the number of the road or trail. Users should refer to the corresponding number in the Short Route Table for designation information.

Game Retrieval: Elk and Bison Only

The limited use of a motor vehicle is allowed off of the designated road system to retrieve a legally hunted and tagged elk or bison during elk or bison hunting seasons as designated by the Arizona Game and Fish Department, and for 24 hours following the end of each season.

When a big game animal has been legally taken, the individual who legally took the animal may drive or be driven to the downed animal. Under no circumstance may a second vehicle be used to retrieve the animal. The vehicle should be of sufficient capacity that only one trip is necessary. The vehicle may only be driven one mile from a designated open road.

Hunters are required to use the most direct and least ground disturbing route in and out of the area to accomplish the retrieval. Motorized game retrieval is not permitted in travel restricted areas, and may not cross riparian areas, streams or wetland areas except at hardened crossings or crossings with existing culverts. Motorized game retrieval is not permitted more than one mile from an open road or when conditions are such that travel would increase the likelihood of negative resource impacts (i.e. muddy, wet soils with potential for compaction and rutting).
